```
for each (image1) in (all images)
    for each (image2) in (all images)
        set variable (fingerprint1) as fingerprint of image (image1)
        set variable (fingerprint2) as fingerprint of image (image2)
        if <(fingerprint1) == (fingerprint2)>
            print Images (image1) and (image2) appear to be similar.
```
