```
set variable (mega most wanted holder) as dictionary

for each (line) in file [example.txt]
    set variable (case) as value before the comma in (line)
    set variable (number) as value after the comma in (line)
    if < (number) > value of (mega most wanted holder) at (case) >
        set value of (mega most wanted holder) at key (case) as (number)

print The highest numbers per cases are

for each (key) and (value) in (mega most wanted holder)
    print Case (key) : (value)
```
